

Buddhism & Science

MAR 25 - 27, 2011

7TH TRANSMISSION WEEKEND

Peter Malinowski,
Matt Huddleston,
Guido Czeija and
many more

The seventh in our series of Transmission Weekends explores the exciting intersection between these two ways of understanding the world around us. Buddhist teachers who are also scientists will share with us the latest scientific discoveries and their relation to Buddhism.

From mirror neurons to near death experiences to the brain in meditation and on to entangled particles and Casimir effect, the speakers will particularly focus on the scientific findings Lama Ole relates to during his lectures.

All Buddhist friends-scientists will also have an opportunity to present their work on posters at the Buddhism & Science „market place“.

Please don't forget to register by filling out the form on our [EC website!](#)
